

Lucas' Linear Art Assignment

I chose to do this style. It looked good and I thought it would be the easiest for me to understand. I did not understand at first so I choose a simpler way and went a lot faster.

1. $y = \frac{5}{6}x + 17$
2. $y = x + 13$
3. $y = \frac{3}{4}x$
4. $y = \frac{2}{3}x - 6$
5. $y = \frac{3}{5}x - 13$
6. $y = \frac{5}{6}x + 17$
7. $y = x + 13$
8. $y = \frac{3}{4}x$
9. $y = \frac{3}{5}x - 6$
10. $y = \frac{1}{2}x - 13$
